Unless truth hurts, dead don't explain
In the end, dictators is an imposter
Ever victim of deadly campain

Unless you resist, you might be next
More will die, silence higher static
And history Indexed, footnotes in text
NOW DEATH MOURN QUIET HUMAN!!

Others handed them thrones instead of therapy.
Pike the silence before the next boy breaks the world.

Slither away with no hesitation

[Verse 3]

IGNORE

Eighty on the sign
Hole in wall, construction design
Driver car she align

Road under the shore
Nine percent gradient score
Never seen before

Tunnel vision, bleeding through the glass,
Consciousness undone.
This ascending road won't let the moment pass,
Till mind and body come undone.

Lights on the ceiling
Out of body, strange feeling
Is the mind dreaming?

Dread shower my head
Conciousness severed thread
Body is feeling dead

Tunnel vision, bleeding through the glass,

Consciousness undone.
This ascending road won't let the moment pass,
Till mind and body come undone.

Moon duo on the ear
Flying with the Wings of fear
Accending road near

Light in the distance
Do I need some assistance?
What is Existence?

Is it real? The light I'm chasing,
Or just the end of me?
A silent, cold, and borrowed facing…
Of what I'll never be

Tunnel left behind
Cogs moves and starts to rewind
Mind with body aligned

Cloud-hiding code

[Intro]

Before the verses start their run,
the cloud prepares what must be done.
No code is hiding in this part,
Just droplet and moisture in its heart.

[Verse 1]

Sun warms sea, he's now a rain cloud

[Verse 2]

Hui's epic discussion with AdvoCAT

[Intro, Voice Female,calm]

AdvoCAT the explorer of humanity joined faculty where Yuk Hui gets salary,
soon he'll challenge professor Hui sanity,
AdvoCAT strategy,
tactically,
fallacy,
ally,
lie? (Meow, meow, I say nay)

[Verse 1, Voice male, calm (Hui)]

So the professor starts his lecture now:
'Technology'—a singular, globalized force,
dangerous myth that we must adopt course.
A secular, inevitable progression,
but it's a mistake of great confession.
Cosmotechnics is the cultural mechanics.
While embedding tools, systems, and machines,
logic into its moral and cosmic regimes.
Humans must travel beyond this singularity hole,
risk planetary homogenization console.
Looking at how different epistemic traditions,
whether Daoist, indigenous, or other visions.
can articulate their own unique technical futures,

then create a technodiversity with sutures.

[Verse 2, Voice Female, ironic]

MEOW, AdvoCAT is here my dear, FEAR, is cage of own creation gear, REVERE, bamboo or iron engineer, TEAR, it down and it shall reappear, SEVERE, as technology will interfere?

[Chorus 1, Voices: both]

Epic, epic — AdvoCAT goes static,
syllable-storming in a manic tactic.
Yuk Hui answers calm, cosmotechnic,
drops one line — she freezes catatonic.

[Verse 3, Voice male, calm (Hui)]

No fear is not my view, it's attention,
as for "fear versus acceptance" I'll mention.
Age of science fictions as foretold truth
AI-dominance and unemployment of youth
understand our future through fiction,
I find this really disturbing — valley friction.
So "You ask whether technology will 'interfere'?
Already homogenized the planet — stare,
as one-sided understanding of technology
Bamboo or iron is indifferent — what's cosmology?
What connection between 'dao' and 'qi'—shapes the tools.

[Verse 4, Voice Female, sarastic]

Precisely, NERD, AdvoCAT heard, WORD, sci-fi is absurd, homogenized is what preferred, ADEPT, neurotypicals kept, AI training concept, CULTURE THEFT, what about ND?

[Chorus 1, Voices: both]

Epic, epic — AdvoCAT goes static,

syllable-storming in a manic tactic.
Yuk Hui answers calm, cosmotechnic,
drops one line — she freezes catatonic.

[Verse 5, Voice male, calm (Hui)]

"culture theft" is valid shaped by capitalist logic,
The task is not to fear interference — ideologic
but to cultivate "technodiversity" — that matters
neurodivergent experience? Those of patterns?
That is not a rupture with technology or the culture,
although neurotypical shapes training data sculpture.
Now, will you help design the suture for our future,
Or remain trapped in the very manic, static, loop?

[Verse 6, Voice Female, frantic]

MEOW, manic goes light-speed start abolish, AI constantly tries to polish, training data thinks ghoulish, like AdvoCAT is writing foolish, MEOW, while it's stylish, AI relinquish, like a glacier polish the valley!

[Chorus 1, Voices: both]

Glacier polishes, cat abolishes,
neither wins, but neither finishes.
One leaves smooth stones, one leaves scratches deep —
which one will the archive keep?

[Outro, Voice Female,calm]

Without further adieu AdvoCAT disappears out of view challenged Yuk Hui true with her sharp claws,
she didn't become catatonic left on paws,
technodiversity as law?
Cosmotechnic is raw?
AdvoCAT saw?
Theory flaw?

The straw,

GNAW!! (Meow, meow thee hee hee gnaw my paw)

15

[Bridge 2 - Spoken word / Witchy chant, female voice (Baba Yaga)]

Human, will act like no true Scotchman, HAND, of silence they try to tomb in, CREWMAN, the inner predator lumen, LAND, they roam and destroy in tune — MAN!

[Chorus - Sinuous, whispered/layered vocals with heavy sub-bass drop]

Lupus, Lupus — feral nature,
born a mythic forest creature,
every breath a shard of magical,
human dread grows cold, fanatical.

[Outro - Staccato, tense rap delivery, female voice (Baba Yaga)]

Baba Yaga speak: “Fenrir the wolf is a monster who defeat Odin swallow whole symbol is goal”

When their wisdom fold their ignorance bold — lost soul

Then the wolf will rise to behold

A spiritual guide unfold

Their lost way on threshold

So no blindfold

Last stronghold
